

Conditions and Allergies

A special diet request form is issued as part of the induction process. Photos of individuals with specific dietary needs are displayed in the nursery kitchen. To maintain confidentiality these are displayed on the inside of cupboard door. New members of staff are informed of children's allergies.

Parents/Carers are requested to make staff aware of any conditions or allergies as part of the induction process. A child's care plan is created to ensure that staff are fully aware of how best to safeguard and support the child in the nursery setting.

Should children require medicine to be administered, an Administer Medicine Form needs to be completed. Medicine is safely stored in an out of reach of children cupboard.
